PUBLICATIONS ON GENERAL CHEMISTRY

Industrial Farm Products Research Division

1. The quantitative estimation of anthraquinone. H. F. Lewis.
Ind. Eng. Chem. 10, p. 425 (1918).
2. Para cymene. I. Nitration. Mononitrocymene, 1-CH₃, 2-NO₂, 4-CH(CH₃)₂.
C. E. Andrews. Ind. Eng. Chem. 10, p. 453 (1918).
3. A method for the rapid analysis of mixtures of chlorinated toluene.
H. A. Lubs and A. B. Clark. J. Amer. Chem. Soc. 40, p. 1449 (1918).
4. The use of benzaldehyde sulfite compound as a standard in the quantitative separation and estimation of benzaldehyde and benzoic acid. G. A. Geiger.
J. Amer. Chem. Soc. 40, p. 1453 (1918).
5. A review of the American patent literature on arsphenamine (Salvarsan) and other arsenicals. H. F. Lewis. Ind. Eng. Chem. 11, 2, p. 141 (1919).
6. The preparation of sodium p-hydroxyphenylarsonate. J. B. Conant.
J. Amer. Chem. Soc. 41, 3, pp. 431-435 (1919).
7. Para cymene. II. The utilization of cymene for the preparation of photographic developers. H. A. Lubs. Ind. Eng. Chem. 11, p. 455 (1919).
8. Para cymene. III. Preparation of 2 Cl, 5, 6-dinitrocymene. H. A. Lubs and R. C. Young. Ind. Eng. Chem. 11, p. 1130 (1919).
9. Phthalic anhydride. I. Introduction. H. D. Gibbs. Ind. Eng. Chem. 11, p. 1031 (1919).
10. Phthalic anhydride. II. The melting point of pure phthalic anhydride: The system: Phthalic anhydride-phthalic acid. K. P. Monroe.
Ind. Eng. Chem. 11, p. 1116 (1919).
11. Phthalic anhydride. III. The system: Naphthalone-phthalic anhydride. K. P. Monroe. Ind. Eng. Chem. 11, p. 1119 (1919).
12. Some aspects of the behavior of charcoal with respect to chlorine. G. S. Bohart and E. Q. Adams. J. Amer. Chem. Soc. 42, 3, pp. 523-544 (1920).
13. Purification of benzoic acid by fractional condensation. Max Phillips and H. D. Gibbs. Ind. Eng. Chem. 12, 3, p. 277 (1920).
14. Production of hydrochloric acid from chlorine and water. H. D. Gibbs. Ind. Eng. Chem. 12, 6, p. 538 (1920).

15. The preparation of lepidine and related bases. L. A. Mikeska.
J. Amer. Chem. Soc. 42, 11, pp. 2396-2397 (1920).
16. Tetramethyl quinolines. L. A. Mikeska and E. Q. Adams. J. Amer. Chem. Soc. 42, 11, pp. 2394-2396 (1920).
17. Alkali fusions. I. The fusion of sodium p-cymene sulphonate with sodium hydroxide for the production of carvacrol. H. D. Gibbs and Max Phillips. Ind. Eng. Chem. 12, p. 145 (1920).
18. Purification of benzoic acid by fractional condensation. Max Phillips and H. D. Gibbs. Ind. Eng. Chem. 12, p. 277 (1920).
19. The absorption spectra of the nitric esters of glycerol. E. Q. Adams. J. Amer. Chem. Soc. 42, 7, pp. 1321-1327 (1920).
20. A synthesis of thymol from p-cymene. Max Phillips and H. D. Gibbs. Ind. Eng. Chem. 12, p. 733 (1920).
21. Syntheses of s-Xylidine. H. L. Haller and E. Q. Adams. J. Amer. Chem. Soc. 42, p. 1840 (1920).
22. Alkali fusions. II. The fusion of sodium benzene disulphonate with sodium hydroxide for the production of resorcinol. Max Phillips and H. D. Gibbs. Ind. Eng. Chem. 12, p. 857 (1920).
CORRECTION, Ind. Eng. Chem. 12, p. 1028 (1920).
23. The use of catalysts in the sulphonation of aromatic compounds. J. A. Ambler and W. J. Cotton. Ind. Eng. Chem. 12, p. 968 (1920).
24. Naphthalene sulphonic acids. I. Some difficultly soluble salts of certain naphthalene sulphonic acids. J. A. Ambler. Ind. Eng. Chem. 12, p. 1081 (1920).
25. Naphthalene sulphonic acids. II. A method for the qualitative detection of some of the naphthalene sulphonic acids. J. A. Ambler and E. T. Wherry. Ind. Eng. Chem. 12, p. 1085 (1920).
26. Naphthalene sulphonic acids. III. An alternative method for the qualitative detection of naphthalene 2-7 and 1-6 disulphonic acids. J. A. Ambler. Ind. Eng. Chem. 12, p. 1194 (1920).
27. Phthalic anhydride. IV. The vapor pressure of phthalic anhydride. K. P. Monroe. Ind. Eng. Chem. 12, p. 969 (1920).
28. Some synthetic resins from furfural. G. H. Mains and Max Phillips. Chem. & Met. Eng. 24, 15, p. 661 (1921).
29. Phthalic anhydride derivatives. A partial collection of names and references. Max Phillips. Ind. Eng. Chem. 13, 3, pp. 247-249 (1921).
30. Benzene disulphonic acid from benzene monosulphonic acid. C. E. Senseman. Ind. Eng. Chem. 13, p. 1124 (1921).

31. Vapor pressure determinations on naphthalene, anthracene, phenanthrene, and anthraquinone between their melting and boiling points. O. A. Nelson and C. E. Senseman. Ind. Eng. Chem. 14, p. 58 (1922).
32. Phthalic anhydride. V. The preparation of phthalic anhydride by the catalysis of the vapor phase reaction between naphthalene and atmospheric air. C. Conover and H. D. Gibbs. Ind. Eng. Chem. 14, p. 120 (1922).
33. Naphthalene sulphonic acids. IV. Solubilities of some amino salts of naphthalene sulphonic acids. H. Wales. Ind. Eng. Chem. 14, p. 317 (1922).
34. Substituted naphthalene sulphonic acids. I. A method for identifying "H" acid and its intermediates obtained from naphthalene 2-7 disulphonic acid. D. F. J. Lynch. Ind. Eng. Chem. 14, p. 964 (1922).
35. The preparation of alpha gamma quinolines. I. 2,4-dimethyl 6-ethoxy quinoline: An improved method for its preparation and a study of the condensation. S. Palkin and M. Harris. Ind. Eng. Chem. 14, p. 704 (1922).
36. Quantitative determination of anthraquinone. O. A. Nelson and C. E. Senseman. Ind. Eng. Chem. 14, p. 956 (1922).
37. The preparation of phenylglycine-o-carboxylic acid. I. From anthranilic acid and chloroacetic acid. H. L. Haller. Ind. Eng. Chem. 14, p. 1040 (1922).
38. Equations for vapor pressures and latent heats of vaporization of naphthalene, anthracene, phenanthrene, and anthraquinone. O. A. Nelson and C. E. Senseman. Ind. Eng. Chem. 15, p. 621 (1923).
39. Vapor pressures of carbazol, observed and calculated. C. E. Senseman and O. A. Nelson. Ind. Eng. Chem. 15, p. 382 (1923).
40. Catalytic oxidation of anthracene to anthraquinone. C. E. Senseman and O. A. Nelson. Ind. Eng. Chem. 15, p. 521 (1923).
41. A synthesis of thymol from para-cymene. II. Max Phillips. J. Amer. Chem. Soc. 45, 6, pp. 1489-1493 (1923).
42. A method for the determination of tolidine. S. Palkin. Ind. Eng. Chem. 15, 10, p. 1045 (1923).
43. The sulfonation of p-cymene. Max Phillips. J. Amer. Chem. Soc. 46, 3, pp. 686-694 (1924).
44. The identification of phenols by means of the spectroscope. S. Palkin and H. Wales, Jr. J. Amer. Chem. Soc. 46, p. 1488 (1924).
45. The preparation of methyl-isopropyl-anthraquinone. Max Phillips. J. Amer. Chem. Soc. 46, 11, pp. 2533-2536 (1924).
46. Elimination of Soluble Tar from sulfonation masses. J. A. Ambler and D. F. J. Lynch. Ind. Eng. Chem. 17, 1, p. 6 (1925).

M. H. MAY 24 1940

47. Vapor pressures and boiling points of mono- and di-methylanilines and mono- and diethylanilines. O. A. Nelson and H. Wales. J. Amer. Chem. Soc. 47, 3, pp. 867-872 (1925).
48. The preparation of 2-aminanthraquinone from phthalic anhydride and chlorobenzene. Max Phillips. Ind. Eng. Chem. 17, 7, p. 721 (1925).
49. Studies in vapor pressures. I. The nitranilines. J. F. T. Berliner and O. E. May. J. Amer. Chem. Soc. 47, 9, pp. 2350-2356 (1925).
50. Toluidine derivatives. I. Quantitative preparation of 5-iodo-2-aminotoluene and some of its derivatives. R. M. Hann and J. F. T. Berliner. J. Amer. Chem. Soc. 47, 6, pp. 1709-1712 (1925).
51. Identification of phenols by means of the spectroscope. II. H. Wales and S. Palkin. J. Amer. Chem. Soc. 48, p. 810 (1926).
52. Studies in vapor pressure. II. The mononitrotoluenes. J. F. T. Berliner and O. E. May. J. Amer. Chem. Soc. 48, p. 2630 (1926).
53. A new paint and varnish remover. Promising use for para cymene, now wasted by-product of sulphite pulp mills. Max Phillips and M. J. Goss. Chem. & Met. Eng. 33, p. 745 (1926).
54. The preparation of 1,4-dichloro-anthraquinone from phthalic anhydride and para-dichlorobenzene. Max Phillips. J. Amer. Chem. Soc. 48, 12, pp. 3198-3199 (1926).
55. The preparation of alizarine from phthalic anhydride and ortho-dichlorobenzene. Max Phillips. J. Amer. Chem. Soc. 49, 2, pp. 473-478 (1927).
56. Naphthalene sulphonic acids. VII. The hydrolysis of naphthalene-1,6-disulphonic acid. J. A. Ambler and J. T. Scanlan. Ind. Eng. Chem. 19, 3, p. 417 (1927).
57. Studies in vapor pressure. III. The toluidines. J. F. T. Berliner and O. E. May. J. Amer. Chem. Soc. 49, 4, pp. 1007-1011 (1927).
58. Studies in vapor pressure. IV. The naphthols. O. E. May, J. F. T. Berliner and D. F. J. Lynch. J. Amer. Chem. Soc. 49, 4, pp. 1012-1016 (1927).
59. Naphthalene sulphonic acids. VIII. The hydrolysis of naphthalene-1,5-disulphonic acid. D. F. J. Lynch and J. T. Scanlan. Ind. Eng. Chem. 19, 9, p. 1010 (1927).
60. Para cymene as a thinner for paints, varnishes and lacquers. P. H. Groggins. Chem. & Met. Eng. 34, 5, p. 291 (1927).
61. o-dichlorobenzene -- An excellent cleaner for metals. P. H. Groggins and Walter Scholl. Ind. Eng. Chem. 19, 9, pp. 1029-1030 (1927).
62. The spectrophotometric detection of boron. W. C. Holmes. J. Assoc. Official Agricultural Chemists, 10, 4, pp. 522-523 (1927).

63. Resins from chlorinated cymene. P. H. Groggins. Ind. Eng. Chem. 20, 6, p. 597 (1928).
64. The manufacture of synthetic anthraquinone. Max Phillips. Zeit. fur Farbenindustrie 20, p. 122 (1928).
65. Nitration - A unit process of chemical engineering. P. H. Groggins. Chem. & Met. Eng. 35, p. 466 (1928).
66. 2-aminoanthraquinone from chlorobenzene and phthalic anhydride. Further studies in its preparation. P. H. Groggins and H. P. Newton. Ind. Eng. Chem. 21, p. 369 (1929).
67. The chemistry of anthraquinone. Max Phillips. Chem. Reviews 6, 1, pp. 157-174 (1929).
68. Amination by ammonolysis - A unit chemical engineering process. P. H. Groggins. Chem. & Met. Eng. 36, 5, pp. 273-275 (1929).
69. How improved production methods brought lower aniline oil prices. Chemical Markets 24, pp. 602-604 (1929).
70. Cracking of high-boiling coal-tar acids. C. E. Senseman. Ind. Eng. Chem. 22, 1, p. 81 (1930).
71. Studies in the Friedel-Crafts reaction. Naphthalene series. I. Preparation of naphthanthraquinone. P. H. Groggins and H. P. Newton. Ind. Eng. Chem. 22, p. 157 (1930).
72. Studies in the Friedel-Crafts reaction. II. Diphenyl series. I. Preparation of 4'-phenyl-2-benzoyl-benzoic acid and its derivatives. P. H. Groggins. Ind. Eng. Chem. 22, pp. 620-625 (1930).
73. Studies in the Friedel-Crafts reaction. III. Diphenyl series. II. Preparation of beta-phenyl-anthraquinone and its derivatives. P. H. Groggins. Ind. Eng. Chem. 22, pp. 626-630 (1930).
74. The search for new uses of aluminum chloride. P. H. Groggins. Chemical Markets 26, pp. 479-481 (1930).
75. Regulating organic reaction under high pressure. P. H. Groggins and R. Hellbach. Chem. & Met. Eng. 37, p. 693 (1930).
76. Aluminum chloride and the Friedel-Crafts reaction. P. H. Groggins. Ind. Eng. Chem. 23, p. 152 (1931). Also, Trans. Amer. Inst. of Chem. Engs. 25, p. 158 (1930).
77. The identification of phenols as the esters of 3,5-dinitrobenzoic acid. Max Phillips and G. L. Keenan. J. Amer. Chem. Soc. 53, p. 1924 (1931).
78. Studies in the Friedel-Crafts reaction. Preparation of 2-aminoanthraquinone from phthalic anhydride and bromobenzene. P. H. Groggins, A. J. Stirton, and H. P. Newton. Ind. Eng. Chem. 23, p. 893 (1931).

79. The catalytic oxidation of p-cymene in the vapor phase. C. E. Senseman and J. J. Stubbs. Ind. Eng. Chem. 23, p. 1129 (1931).
80. Catalytic oxidation of p-cymene in the liquid phase. C. E. Senseman and J. J. Stubbs. Ind. Eng. Chem. 24, 11, p. 1184 (1932).
81. Amination by ammonolysis. I. Properties and reactions of aqueous ammonia system. P. H. Groggins and A. J. Stirton. Ind. Eng. Chem. 25, p. 42 (1933).
82. Amination by ammonolysis. II. Effect of metal catalysts in ammonolysis. P. H. Groggins and A. J. Stirton. Ind. Eng. Chem. 25, p. 46 (1933).
83. Amination by ammonolysis. III. Effect of inorganic salts. P. H. Groggins and A. J. Stirton. Ind. Eng. Chem. 25, p. 169 (1933).
84. Amination by ammonolysis. IV. Design and construction of equipment. P. H. Groggins. Ind. Eng. Chem. 25, p. 274 (1933).
85. Amination by ammonolysis. V. Control of the ammonia recovery system. P. H. Groggins. Ind. Eng. Chem. 25, p. 277 (1933).
86. Dry distillation of residue of waste sulfite liquor. Max Phillips. Ind. Eng. Chem. 25, p. 991 (1933).
87. Preparation of 1,2- and 2,3-diaminoanthraquinones. P. H. Groggins and H. P. Newton. Ind. Eng. Chem. 25, p. 1030 (1933).
88. Studies in the Friedel-Crafts reaction. Effect of size of aluminum chloride particles in the preparation of some keto acids. P. H. Groggins and R. H. Nagel. Ind. Eng. Chem. 25, p. 1083 (1933).
89. Catalytic oxidation of ethylbenzene in the liquid phase. C. E. Senseman and J. J. Stubbs. Ind. Eng. Chem. 25, p. 1286 (1933).
90. Unit processes in organic synthesis. Edited by P. H. Groggins. Chem. & Met. Eng. 41, 5, pp. 266-274 (1934).
91. Studies in the Friedel-Crafts reaction. Preparation of ketones and keto acids. P. H. Groggins and R. H. Nagel. Ind. Eng. Chem. 26, p. 1313 (1934).
92. Studies in the Friedel-Crafts reaction. Condensation of carboxylic acids. P. H. Groggins, R. H. Nagel, and A. J. Stirton. Ind. Eng. Chem. 26, p. 1317 (1934).
93. Sintered glass absorber for determining carbon by wet combustion. P. A. Wells, O. E. May and C. E. Senseman. Ind. Eng. Chem., Anal. Ed., 6, 5, pp. 369-370 (1934).
94. Benzophenones from carboxylic acids. H. P. Newton and P. H. Groggins. Ind. Eng. Chem. 27, 12, p. 1397 (1935).
95. 4-Chloroacetophenone. Catalytic oxidation in the liquid phase. J. J. Stubbs and C. E. Senseman. Ind. Eng. Chem. 28, pp. 559-560 (1936).

96. The ammoniation of waste sulphite liquor and its possible utilization as a fertilizer material. Max Phillips, M. J. Goss, B. E. Brown and F. R. Reid. J. Agricultural Research, 53, 3, pp. 209-224 (1936).
97. Amination by ammonolysis. Effect of ammonia concentration. F. H. Groggins and A. J. Stirton. Ind. Eng. Chem. 28, 9, p. 1051 (1936).
98. Electrochemical production of sodium chlorate. F. H. Groggins, A. L. Pitman, J. McLaren, and F. H. Davis. Chem. & Met. Eng. 44, 6, pp. 302-307 (1937).
99. Recent progress in amination by ammonolysis. F. H. Groggins and A. J. Stirton. Ind. Eng. Chem. 29, 12, p. 1353 (1937).

1. The first part of the report is devoted to a general survey of the situation in the country. It is a very interesting and well-written account of the country and its people. The author has done a great deal of research and has gathered a wealth of material. The report is a valuable contribution to the knowledge of the country and its people.

2. The second part of the report is devoted to a detailed study of the economic situation. It is a very thorough and well-written account of the economic situation. The author has done a great deal of research and has gathered a wealth of material. The report is a valuable contribution to the knowledge of the country and its people.

3. The third part of the report is devoted to a detailed study of the social situation. It is a very thorough and well-written account of the social situation. The author has done a great deal of research and has gathered a wealth of material. The report is a valuable contribution to the knowledge of the country and its people.

4. The fourth part of the report is devoted to a detailed study of the political situation. It is a very thorough and well-written account of the political situation. The author has done a great deal of research and has gathered a wealth of material. The report is a valuable contribution to the knowledge of the country and its people.
